

The Moody Bible Institute of Chicago Alcohol and Drug Free Schools and Communities Act

**Policy Statement and Notification
(last revised August 16, 2016)**

This Policy Statement and Notification is being provided to all students and employees of The Moody Bible Institute of Chicago ("MBI") in compliance with the Drug Free Schools and Communities Act Amendments of 1989.

Standards of Conduct for Students and Employees

It is the policy of MBI to prohibit the manufacture, possession, use, consumption, distribution and/or sale of all illicit drugs or alcohol by student and employees, (1) on property owned, operated, or controlled by MBI, or (2) in association with any school-related activities or employment duties, whether those activities occur on or off campus. This includes student conduct both on and off campus when enrolled in Moody undergraduate or Moody Theological Seminary course work, when living in MBI residence halls, when in any public or private area of campus, or when in vehicles owned or operated by MBI.

All members of the MBI community, including students and employees, are responsible for being familiar and complying with MBI policies and the requirements of federal, state, and local laws concerning the manufacture, dispensation, possession, use, consumption, distribution and/or sale of controlled substances and alcohol. MBI expects each member of the MBI community to be responsible for his or her own conduct and the consequences of that conduct.

Description of Applicable Sanctions

Local, state and federal laws prohibit the unlawful possession, use, or distribution of illicit drugs and alcohol. The courts may impose strict legal sanctions upon an individual who is found to have violated these legal prohibitions. When applicable, available legal sanctions include, but are not limited to, the imposition of fines, imprisonment, forfeiture of property, non-voluntary community service, probation, required medical or psychiatric treatment, rehabilitation, treatment as approved by the applicable agency in the States of Illinois, Michigan, and Washington, and restitution. An individual's status as a student or employee in no way prevents a court from imposing any of these sanctions.

Please see **Appendices A, B, C, and D** attached hereto and incorporated by this reference for a description of applicable legal sanctions under Federal, State (Illinois, Michigan, and Washington), and Local (Chicago, Plymouth, and Spokane) law, for the unlawful possession or distribution of illicit drugs and alcohol.

Anyone violating these MBI policies or applicable laws may also be subject to sanctions by MBI, in addition to any legal sanctions by applicable governmental authorities. MBI may impose disciplinary sanctions upon any student or employee who is found to be in violation of laws or MBI policies relating to the unlawful possession, use, or distribution of illicit drugs and alcohol.

For employees, based upon the seriousness of the offense, such sanctions may include, without limitation, reprimand, probation, suspension, termination of employment, and possibly referral for prosecution.

For students, the minimum sanction for a student's first offense of alcohol use or illicit drug possession, use, or distribution ranges from a formal reprimand to dismissal based on the seriousness of the offense. The normal sanction for a second offense of alcohol use or a drug offense ranges from warning status to expulsion based on the seriousness of the offense. Each disciplinary measure serves as an evaluation period of the student's behavior and also a warning that further rule violations will result in more stringent disciplinary measures. Parents may be notified regarding instances of alcohol or illicit drug misuse or abuse.

In addition to the above sanctions, students may be subject to expulsion and termination of student employment, and they may also be referred for prosecution.

Potential Health Risks Associated with Alcohol and Other Drug Use

The illegal use of controlled substances and abuse of alcohol may cause serious health problems, impair performance, and endanger the safety and well-being of students, faculty, staff, and members of the general public. Because it is readily available and its use is not necessarily illegal, the drug which tends to have the greatest potential for harm to the most people is alcohol. Negative health and social consequences which may occur as a result of the use of alcohol include accidents, assaults (physical or verbal), and other problems related to health and productivity. The use of alcohol by pregnant women, alcoholics, and people who are ill or on medication is especially dangerous. In all instances, MBI observes relevant State of Illinois, Michigan, and Washington laws and regulations pertaining to alcohol. Please see Appendix E for more information on related health risks associated with alcohol and drug use.

Substance Abuse Resources

Students

MBI encourages any students who may have a problem with the use of drugs or alcohol to seek professional advice and treatment. Some of these services may be without charge and the cost of others may require payment by the student. MBI will assist students who seek information or are concerned about drug or alcohol use by connecting them with appropriate services. While initial assistance can be sought through MBI Personnel, any treatment would need to be sought directly by the student from local treatment providers who specialize in the field of addictions. Please see Appendix F, G, and H for a suggested list of currently available third party treatment services. Parents may be involved in discussions where a student seeks treatment for rehabilitation purposes.

Employees

MBI encourages any employees who may have a problem with the use of drugs or alcohol to seek professional advice and treatment. Some of these services may be without charge and the cost of others may require payment by the employee. MBI will assist employees who seek information or are concerned about drug or alcohol problem by connecting them with appropriate services. While initial assistance can be sought through MBI Personnel, any treatment would need to be sought directly by the employee from local treatment providers who specialize in the field of addictions. Please see Appendices F, G, and H attached hereto and incorporated by this reference for a suggested list of currently available third party treatment services.

APPENDIX A

FEDERAL LEGAL PENALTIES

Federal laws make the illegal possession and sale of drugs serious crimes. Convictions for violations of these laws can lead to imprisonment, fines, community service and a permanent criminal record. In addition to these penalties, convictions can also result in, among other penalties, property used in connection with illegal drugs being confiscated and federal student loans, grants and contracts being denied. The following sections describe certain relevant legal penalties under federal laws with respect to illegal drug possession and sale.

FEDERAL DRUG PENALTIES

Federal law penalizes the manufacture, distribution, possession with intent to manufacture or distribute and simple possession of illegal drugs. Federal law penalties for possessing illegal drugs alone are harsh, as described below:

- First conviction: up to one-year imprisonment, a fine of at least \$1,000 or both; after one prior drug conviction: 15 days to two years imprisonment and a fine of at least \$2,500; and after two or more prior drug convictions: 90 days to three years imprisonment and a fine of at least \$5,000 (21 U.S.C. §844(a)).
- Forfeiture of personal and real property used to possess or to facilitate possession of the illegal drugs if that offense is punishable by more than one-year imprisonment, as well as forfeiture of vehicles used to transport or conceal an illegal drug (21 U.S.C. §§853(a) & 881(a)).
- Denial of federal benefits, such as student loans, grants, contracts, and professional and commercial licenses, up to one year for the first offense and up to five years for the second and any subsequent offense (for trafficking, it is five years for the first offense, 10 years for the second offense and permanently for the third offense) (21 U.S.C. §862).

Under federal law, a federal or state conviction for illegal drug possession or sale that occurs while a student is enrolled and receiving federal aid can disqualify a student from receiving any federal student aid funds, such as loans and grants (20 U.S.C. §1091(r)(1)). The table below illustrates the period of ineligibility for federal student aid funds, depending on whether the conviction was for possession or sale and whether the student had previous offenses:

No. Offenses	Possession of Illegal Drugs	Sale of illegal drugs
1st Offense	1 year from date of conviction	2 years from date of conviction
2nd Offense	2 years from date of conviction	Indefinite Period
3+ Offenses	Indefinite Period	

Federal law penalties for trafficking illegal drugs are considerably more severe than those outlined above. The following tables from the U.S. Department of Justice and Drug Enforcement Administration outline federal trafficking penalties for illegal drugs.

ILLINOIS DRUG PENALTIES

Illinois and City of Chicago laws make the illegal possession and sale of drugs and alcohol serious crimes. Convictions for violations of these laws can lead to imprisonment, fines, community service and a permanent criminal record. In addition to these penalties, convictions can also result in, among other penalties, property used in connection with illegal drugs being confiscated and federal student loans, grants and contracts being denied. The following sections describe certain relevant legal penalties under Illinois laws with respect to illegal drug possession and sale, Illinois laws with respect to alcohol and City of Chicago laws regarding alcohol and illegal drug possession and sale.

ILLINOIS DRUG PENALTIES

Illinois illegal drug laws set forth a variety of penalties for illegal drug possession and sale, as set forth in the table below.

NITROUS OXIDE 720 ILCS §5/24.5-10	Class 3 Felony: up to \$25,000 Fine &/or 2 to 5 Years in Jail

Under Illinois law, these penalties can be increased by a number of factors, including, for example, if illegal drug sales occur in or on the grounds of any school or within 1,000 feet of the same (720 ILCS §570/407).

ILLINOIS ALCOHOL AND ALCOHOL-RELATED PENALTIES

Illinois law prohibits the consumption and possession of alcohol by persons under the age of 21 and the supplying of alcohol to any person under the age of 21. Additionally, Illinois law prohibits the sale of alcoholic beverages except by those licensed to sell such beverages. Illinois law and City of Chicago ordinances also prohibit public intoxication to a degree that it endangers people or property or annoys people in the vicinity, the operation of a vehicle under the influence of alcohol or other intoxicants, and the consumption of alcohol on a public way. Violation of these laws or other laws relating to drugs and alcohol may result in probation, fines, imprisonment, and a permanent criminal record. The following sections set forth in some detail state statutes regarding alcohol use by any person under the age of 21.

State Alcohol Sanctions: Persons under 21 who present or offer false evidence for purposes of obtaining alcohol shall be fined between \$500 and \$2,500, must perform 25 hours of community service, and may be jailed for up to one year. Persons under 21 in possession of alcohol on or in any street or public place may be imprisoned for up to one year and fined \$2,500 (235 ILCS §5/6-16).

Fake ID Sanctions: Under Illinois law, possession or display of any driver's license or identification card that is "fraudulent" (i.e., produced by someone other than a government office) is a Class 4 felony punishable by one to three years imprisonment or up to \$25,000, or both (15 ILCS §335/14B). Knowing duplication, manufacture, sale, or transfer of such fraudulent license or identification is a Class 3 felony punishable by two to five years imprisonment or up to \$25,000, or both (15 ILCS §335/14B). Possession, transfer, or use of "fictitious" identification (a genuine identification with false information) and/or unlawful alteration of an identification card is a Class 4 felony punishable by one to three years imprisonment or up to \$25,000, or both (15 ILCS §335/14A). Using the identification of another person or lending identification for use by another person is a Class A misdemeanor punishable by up to one year imprisonment or a fine of up to \$2,500, or both (15 ILCS §335/14). Persons under 21 who present or offer false evidence for purposes of obtaining or purchasing alcohol shall be fined between \$500 and \$2,500, must perform at least 25 hours of community service, and/or may be jailed for up to one year (235 ILCS §5/6-16).

CITY OF CHICAGO ALCOHOL AND DRUG PENALTIES

Under the Chicago Municipal Code, it is illegal for anyone under age 21 to purchase, deliver, possess or consume alcohol, and it's also illegal for anyone to sell, give or deliver alcohol to someone under age 21 (Chicago Municipal Code §8-16-60). Penalties for violating this law are fines ranging from \$5 to \$100 (Chicago Municipal Code §8-16-130). A person under 21 being intoxicated is a violation of the Chicago Municipal Code, punishable with a \$25 fine for the first offense and not more than \$100 for every subsequent offense (Chicago Municipal Code §8-16-50). It is also unlawful for any person to drink any alcoholic liquor on any public way or in a motor vehicle upon a public way in Chicago. Penalties include a fine ranging from \$100 to \$1,000 and/or up to six months imprisonment (Chicago Municipal Code §8-4-030).

Possession of up to 15 grams of cannabis in Chicago is punishable by a fine ranging from \$250 to \$500 for the first offense, and \$500 for the second and each subsequent violation occurring within a period of 30 days, and in addition to the fine, drug awareness or drug education program and/or community service may be required (Chicago Municipal Code 7-24-099). Chicago also prohibits the use of narcotics or dangerous drugs prohibited by Illinois law, a violation of which is punishable by a fine of up to \$200 for each offense (Chicago Municipal Code 7-24-080). Finally, Chicago prohibits possession, delivery, or manufacture of drug paraphernalia, which are punishable by up to a \$2,000 fine and/or six months imprisonment (Chicago Municipal Code 7-24-091; 7-24-092).

APPENDIX C

WASHINGTON DRUG PENALTIES

Washington and City of Spokane laws make the illegal possession and sale of drugs and alcohol serious crimes. Convictions for violations of these laws can lead to imprisonment, fines, community service and a permanent criminal record. The following sections describe certain relevant legal penalties under Washington laws with respect to illegal drug possession and sale, legal penalties with respect to illegal possession of alcohol, and City of Spokane laws regarding alcohol and illegal drug possession and sale.

WASHINGTON DRUG PENALTIES (RCW 69.50)

The State of Washington defines “controlled substance” as “a drug, substance, or immediate precursor included in Schedules I through V as set forth in federal or state laws, or federal or commission rules,” which includes the following (among other substances): Narcotics (opium and cocaine, and all drugs extracted, derived or synthesized from opium and cocaine, including crack cocaine and heroin); Methamphetamine; Barbiturates; and Hallucinogenic Substances (LSD, peyote, mescaline, psilocybin, PCP) (RCW 69.50.101).

1. State Penalties for Illegal Manufacture or Delivery (or Possession with Intent to do Either of the Foregoing) of Controlled Substances (RCW 69.50.401; RCW 9A.20):

- Schedule I or II Narcotics or flunitrazepam – Class B felony punishable with up to 10 years in prison, \$100,000 fine for amounts up to 2 kg (plus up to \$50 for each gram thereafter), or both.
- Any other controlled substances under Schedule I, II, III, IV or V, except flunitrazepam – Class C felony punishable with up to 5 years in prison, \$10,000 fine, or both.

2. State Penalties for Possession of Controlled Substances: Possession of any controlled substance is a Class C felony punishable by up to 5 years in prison, a \$10,000 fine, or both (RCW 69.50.4013; RCW 9A.20).

More severe penalties are provided for persons convicted of providing controlled substances to any person under the age of 21, to repeat offenses and to offenses on or near schools or parks (See, e.g., RCW 69.50.408; RCW 69.50.430; RCW 69.50.435).

It is also unlawful to give, use, or possess drug paraphernalia for the manufacture, delivery, possession, or use of a controlled substance (RCW 69.50.412; RCW 69.50.4121). A person violating the foregoing is guilty of a misdemeanor, which is punishable with up to 90 days in prison, a \$1,000 fine, or both (RCW 69.50.412; RCW 9A.20).

Under Washington law, Marijuana remains illegal for persons under 21 years of age to possess, sell or use and is illegal to possess for a person of any age in amounts over 28.3 grams. As described in Appendix A, marijuana also remains illegal under federal law and policies concerning marijuana at the

College remain unchanged. It is illegal to produce, distribute or use marijuana on College property or during College-sponsored activities.

WASHINGTON ALCOHOL PENALTIES

Persons under the age of 21 may not possess, consume, or otherwise acquire alcohol, nor may other persons furnish alcohol to anyone under 21 or permit underage consumption on premises within their control. Persons under 21 also may not be in a public place or in a vehicle in public while exhibiting the effects of having consumed alcohol. A public place includes city streets and any buildings and grounds used for University purposes. A violation of any of the foregoing can result in a gross misdemeanor punishable with fines of up to \$5,000 or imprisonment for up to 12 months, or both (RCW 66.44.270; RCW 9A.20.021). Persons under 21 may not purchase or attempt to purchase alcohol (RCW 66.44.290). A violation of the foregoing can result in a misdemeanor punishable with fines of up to \$1,000 or imprisonment for up to 90 days, or both (RCW 9A.20.021). Alcohol may not be opened or consumed in a public place (RCW 66.44.100). A violation of the foregoing can result in a class 3 civil infraction punishable with a fine of \$50 (RCW 66.44.100; RCW 7.80.120).

CITY OF SPOKANE DRUG AND ALCOHOL LAWS

Under Spokane Municipal Code it is illegal to loiter for the purpose of engaging in drug-related activity (Spokane Municipal Code 10.15.020). A violation of the foregoing is punishable with a fine of up to \$5,000 (Spokane Municipal Code 10.15.030). It is also unlawful for any person to sell, give, or permit to be sold or given any drug paraphernalia or to use such drug paraphernalia for the purpose of manufacturing or introducing into the human body a controlled substance (Spokane Municipal Code 10.15.020). Persons committing such violations can be guilty of up to a gross misdemeanor, which can be penalized by fines of up to \$1,000, prison time of up to one year, or both. Additionally it is illegal for anyone under the age of 21 to possess, consume, or distribute alcohol (Spokane Municipal Code 10.08.210). The penalty for a first offense includes a fine up to five hundred dollars, or to imprisonment for not more than two months, or both, and the penalty for a second offense can lead to imprisonment for up to six months. The third or subsequent offenses can lead to imprisonment for up to one year (Spokane Municipal Code 10.08.250).

APPENDIX D

MICHIGAN DRUG PENALTIES

Michigan and City of Plymouth laws make the illegal possession and sale of drugs and alcohol serious crimes. Convictions for violations of these laws can lead to imprisonment, fines, community service and a permanent criminal record. The following sections describe certain relevant legal penalties under Michigan laws with respect to illegal drug possession and sale, legal penalties with respect to illegal possession of alcohol, and City of Plymouth laws regarding alcohol and illegal drug possession and sale.

MICHIGAN DRUG PENALTIES

Any individual knowingly or intentionally possessing a controlled substance is guilty of, at a minimum, a misdemeanor punishable by a fine of \$1,000 or by imprisonment for up to a year, or both, and at a maximum, a felony punishable by a fine of up to \$1,000,000 or imprisonment for life, or both (MCL 333.7403). Penalties increase substantially based upon the amount of the controlled substance and the amount of violations.

MICHIGAN ALCOHOL PENALTIES

The state of Michigan provides that a person under the age of 21 shall not purchase, consume, or possess alcohol or attempt to do any of the foregoing. The penalty for the first violation is a fine up to \$100. The penalty for the second violation is a fine up to \$200, up to 30 days imprisonment, or both. The penalty for the third or any subsequent violations is a fine up to \$500, up to 60 days imprisonment, or both. Additionally, the court may order participation in substance abuse prevention services and community service for any of the foregoing violations (MCL 436.1703).

CITY OF PLYMOUTH DRUG AND ALCOHOL LAWS

No person may possess any controlled substance or drug paraphernalia (Plymouth Code of Ordinances 54-276; 54-278). First time offenders will be subject to court ordered probation that includes instruction on the rehabilitation on the medical, psychological and social effects of the misuse of drugs. Failure to meet the terms and conditions of the court ordered probation will result in further court ordered punishment and the court will proceed as it determines (Plymouth Code of Ordinances 54-277).

No person under the age of 21 may buy, obtain, or drink any alcoholic beverage (Plymouth Code of Ordinances 6-5). Violation of the ordinance will result in fines, substance abuse prevention classes, and/or court ordered probation (Plymouth Code of Ordinances 6-9).

APPENDIX E

Additional Information on Related Health Risks Associated with Alcohol and Drug Use

Alcohol consumption causes a number of marked changes in behavior. Even low doses significantly impair the judgment and coordination required to drive a car safely, increasing the likelihood that the driver will be involved in an accident. Low to moderate doses of alcohol also increase the incidence of a variety of aggressive acts, including domestic/dating violence and child abuse. Moderate to high doses of alcohol cause marked impairments in higher mental functions, severely altering a person's ability to learn and remember information. Very high doses cause respiratory depression & death. If combined with other depressants of the central nervous system, much lower doses of alcohol will produce the effects just described. Repeated use of alcohol can lead to dependence. Sudden cessation of alcohol intake is likely to produce withdrawal symptoms, including severe anxiety, tremors, hallucinations, and convulsions. Alcohol withdrawal can be life threatening. Long-term consumption of large quantities of alcohol, particularly when combined with poor nutrition, can also lead to permanent damage to vital organs such as the brain and the liver. Mothers who drink alcohol during pregnancy may give birth to infants with fetal alcohol syndrome. These infants have irreversible physical abnormalities and mental retardation. In addition, research indicates that children of alcoholic parents are at greater risk than other youngsters of becoming alcoholics.

Hallucinogens disrupt the brain chemicals that enable us to make sense out of our environment. Most of those used by college students are manufactured chemical compounds. The most common compound is LSD (d-lysergic acid diethylamide). It and other hallucinogens are potent and extremely unpredictable drugs that produce fast acting and unexpected effects. The most common acute reactions are panic from severe anxiety and intense fear of losing control, and psychotic reactions involving severe breaks with reality, persistent hallucinations, and delusions. Psychotic reactions have been known to last weeks or months and often require hospitalization. The long-term or chronic effects of LSD use are not known at this time, but many ex-users report experiencing flashbacks, even several years after a bad trip.

Marijuana is an illegal drug with high potential for abuse. Because it affects the way a person thinks, learns, and acts, its use is especially harmful, even dangerous, in many situations. Marijuana interferes with speech, memory, and learning, and makes tasks that require a clear mind difficult, meaningless, or unsafe. It also slows reactions & interferes with coordination. Marijuana's dangers increase in combination with alcohol. Marijuana smoking also poses a serious threat to the user's lungs, heart, immune system, and reproductive systems.

Inhalants include easy-to-obtain products such as cleaning fluids, solvents, aerosols, and airplane glue. They act on the central nervous system much like such volatile anesthetics as ether & chloroform, and produce bizarre perceptual and hallucinatory actions. Short-term physical effects include sneezing, lack of coordination, loss of appetite, rapid heartbeat, and seizures. Psychological effects include euphoria, exhilaration, confusion, disorientation, loss of inhibitions, and impulsive behavior that may lead to injuries and accidents. Long-term health risks include nosebleeds, loss of consciousness, hepatitis, liver failure, kidney failure, respiratory depression, blood abnormalities, irregular heartbeat, and possible suffocation.

Depressants include barbiturates, sedatives, and anti-anxiety drugs. They are usually taken orally. They depress not only the activity of the brain, causing an effect on the heart and respiration, but also muscle tissues. Short-term physical effects include drowsiness, slurred speech, irritability, stupor, and impaired judgment, memory, and attention. Long-term effects include disrupted sleep, psychosis, respiratory depression, coma, and neuropsychological and structural brain damage. Withdrawal can produce extreme anxiety, insomnia, convulsions, and death.

Narcotics include opium, morphine, heroin, codeine and synthetic substances that can be taken orally, snorted, smoked, or injected into the skin or a vein. They relax the central nervous system and appear to be able to reduce anxiety levels, promote drowsiness, and allow sleep in spite of severe pain. Short-term physical effects include pinpoint pupils, lethargy, skin abscesses, chronic constipation, nausea, and respiratory depression.

Psychological effects include anxiety, irritability, mood swings, depression, drug seeking, and antisocial behavior.

Cocaine is a white crystalline powder, often diluted with other ingredients. Crack cocaine is a light brown or beige pellet or crystalline rock that resembles coagulated soap. Cocaine is inhaled through the nasal passages or injected; crack is smoked. Cocaine speeds up physical and mental processes, creates a sense of heightened energy and confidence, and alters the pleasure centers in the brain. Physical short-term effects include headache, exhaustion, shaking, dilated pupils, blurred vision, nausea, loss of appetite, palpitations, and arrhythmias. Psychological effects include impaired judgment, hyperactivity, suspicion, acute anxiety, paranoid ideation, and violence. Repeated use or use of high dosages causes long-term effects. The effect on the central nervous system suppresses the desire for food, sex, and sleep. The cardiovascular system is affected resulting in high blood pressure, irregular heart rate, damage to heart tissue, constriction of blood vessels, and stroke. Cocaine also causes neurological and respiratory damage; there is danger of respiratory arrest. It damages the mucous membranes of the nasal passages and causes sinusitis and a loss of sense of smell. The male reproductive system is also negatively affected. In women there are implications for the fetus in the event of pregnancy.
